Experience Design: Learners & Users

Trigger Warning

Today's topics include circumstances that can lead to poverty and violence, how they affect learning, and how we can mitigate the effects.

Outline

Understanding Users: Maslow's Hierarchy of Needs

Designing for a User: Affordances

Avoiding Design Pitfalls: User Profiles

Understanding Users

Self-actualization

desire to become the most that one can be

Esteem

respect, self-esteem, status, recognition, strength, freedom

Love and belonging

friendship, intimacy, family, sense of connection

Safety needs

personal security, employment, resources, health, property

Physiological needs

air, water, food, shelter, sleep, clothing, reproduction

Maslow's hierarchy of needs

Hierarchy of Needs

- What outside life circumstances could negative effect learning and why?
 - Fearing for safety takes up mental energy at school
 - Insecure about intelligence less willing to ask questions
 - Lack of sleep, illness, less energy, distracting
 - Not feeling loved -> distracted, thinking about your loneliness / sadness
 - lack of belonging makes it harder to connect to students in classroom and collaborative learning
 - Hunger some children just can't think straight
 - No clean clothes embarrassment and not paying attention or truancy
 - less access to schools, less well-funded schools, fewer resources

Hierarchy of Needs

Self-actualization
design to become the most that one can be

Esteem
respect, self-estsem, status, recognition, strength, freedom

Love and belonging
friendship, intimacy, family, sense of connection

Safety needs
personal security, employment, resources, health, property

Physiological needs
air, water, food, shelter, sleep, dothing, reproduction

Maslow's hierarchy of needs

- Effects on learning
 - Trauma is distracting
 - Hunger is distracting
 - Fear is distracting
 - Pain is distracting
 - Bullying has academic consequences
 - Students who don't belong
 - Stereotype threat: internal
 - Bias, discrimination: external
 - Students who are curious learn more

Different poverty influences

winderstoon here on the control of the state of the state

Hunger

School quality / resources based on local taxes

Lack of clean clothes

Access to menstrual products (truancy)

Less safe neighborhood

Access to enrichment as well as computers / internet

Less help for school work be of long working hours, less education of parents

Less heating -> less sleep

Needing a part-time job to help family

Imposter syndrome, not feeling they deserve extra help

Embarrassed they can't afford things others can

Different security influence

Self-actualization
desire to become the most that one can be

Esteem
respect, self-esteem, status, recognition, strength, freedom

Love and belonging
friendship, intimacy, family, sense of connection

Safety needs
personal security, employment, resources, health, property

Physiological needs
air, water, food, shelter, sleep, clothing, reproduction

Maslow's hierarchy of needs

Anxiety - distracting

Lack of trust in authority figures (e.g. teachers)

ĸŖŖŖijĠŎĹĬĸŖĠŎĸĸĊſŖĸŎŎŖĸŖŖŖijĠŎĹĬĸŖĠŎĸĊſŖĸŎŎŖĸŖŖŖijĠŎĹĸĸĠ

Truancy - path the school isn't, hiding bruising,

Different belonging influences

PANTONIA SE LE LA CONTRACTION DE LA CONTRACTION

Distracted

Collaborative work might be less effective

Bullying may lead to missing school

Decrease motivation

Different esteem influences

Self-actualization
desire to become the most that one can be

Esteem
respect, self-esteem, status, recognition, strength, freedom

Love and belonging
friendship, inthmacy, family, sense of connection

Safety needs
personal security, employment, resources, health, property

Physiological needs
air, water, food, shetter, sleep, clothing, reproduction

Maslow's hierarchy of needs

- AND CONTRACTOR SANDON NO STREET CONTRACTOR SANDON SANDON

A MARKET PROPERTY OF THE PROPE

Breakout 1: Helpful Programs

- What programs could help with deficiencies?
 - Free school lunches / breakfast bars
 - Financial literacy workshops
 - Community centers for after school
 - Bussing for transportation
 - Counseling / mental health services
 - Bullying awareness Social / Emotional curriculum
 - Tutoring programs
 - Uniforms
 - Washer & dryer in the school
 - Had a staff member work with every family to sign them up for social programs

What programs might help? (in and out of school)

Self-actualization
desire to become the most that one can be

Esteem
respect, self-asteem, status, recognition, strength, freedom

Love and belonging
friendship, intimacy, family, sense of connection

Safety needs
personal security, employment, resources, health, property

Physiological needs
air, water, food, shelter, steep, clothing, reproduction

Maslow's hierarchy of needs

In School

WARRENDO NEGO META DO PROPERTO DE LA COMPETATORIA DELA COMPETATORIA DEL COMPETATORIA DE LA COMPETATORIA DE LA COMPETATORIA DEL COMPETATORIA DELICA DEL COMPETATORIA DEL CO

Out of School

Hierarchy of Needs

- What programs could help with challenges?
 - Social programs to provide food, shelter, clothing
 - Washer / Dryer in schools (clean clothing)
 - Social Emotional Learning programs (bullying, anti-trauma)
 - School identity development (belonging)
 - Free after-school programs, libraries, etc. (safety)
 - Crossing guards, safety corridors (safety)

Affordances: Designing for a User

Affordances

Blind Spots: Novices vs Experts

How did / would this activity feel to someone who doesn't read music?

https://www.youtube.com/watch?v=_4IRMYuE1hI

Guitar Hero Musical Notation

Design fails for females / ethnic minorities

A lot of games don't have hairstyles that represent black people

PPE equipment didn't fit women correctly & ethnic minorities

Car crash test dummies used to be exclusively the height and weight of males

Air bags

Seat belts for women who are pregnant

Medical research was performed on white males of a certain age

Major symptoms lists tend to focus on symptoms of white males

Facial recognition does not properly analyze African-Americans' faces

Voice recognition for people with accents and some names

Design fails for females / minorities

- Air bags
 - Crash test dummies were adult male sized
 - O Killed children and small females in passenger seat
 - O Killed small female drivers from steering wheel airbag
- Ill-fitting PPE (masks too large and won't seal)
- Body armor doesn't account for female chests
- Facial recognition software (minorities falsely accused)
- One-size-fits-all clothing
- Voice recognition software
- https://www.theguardian.com/lifeandstyle/2019/feb/23/truth-world-built-for-men-ca r-crashes

Design successes

- Volvo female design team (2004)
 - Parallel parking assistance
 - More compartments (for handbags)
 - Recommended seat position based on body dimensions

Avoiding Pitfalls: User Profiles

Mix of challenges (in school, out of school)

Mix of backgrounds

Mix of academic skills

Mix of personality traits

Caveat: We **don't** want profiles to be sexist or racist based on stereotypes, We **do** want ones based on realistic circumstances.

Example: A profile of a girl who is bad at math or Asian boy who is a math whiz (bad - reinforces false beliefs about genetics and harmful stereotypes)

Example: A profile of an immigrant family that fled gang violence in El Salvador (good - makes you think deeply about someone's challenging situation)

Breakout #2: User Profiles

Design **four user profiles** of a middle-school or high-school student. They must represent a variety of design targets that could result in different design decisions. Therefore, across them, they need to have different hobbies, academic strengths and weaknesses, gender and ethnicities. I have specified one aspect of each user, but you also need to balance the other attributes across the four profiles
